

Akil Tajwar Chowdhury

Full Stack Software Engineer (Node.js | Next.js | TypeScript)

Address: West Shewrapara, Mirpur, Dhaka

Phone: +8801871844629

Email: akiltajwar@gmail.com

[GitHub](#) | [Portfolio](#) | [LinkedIn](#)

Full Stack Software Engineer specializing in Node.js, Next.js, TypeScript, and JavaScript, with professional experience building production web applications and REST APIs. Skilled in Docker, Git/GitHub workflows, database integration, debugging, clean code, and VPS/cloud deployment.

Experience

Software Engineer – BizFlow Software Company

Nov 2024 – Present

- Developed and maintained production web applications using Next.js, TypeScript, JavaScript, Node.js, Express.js, and MySQL.
- Designed and maintained RESTful APIs and relational database workflows, integrating frontend applications with backend services.
- Debugged production issues, optimized SQL queries and backend services, and improved application performance and reliability.
- Containerized applications using Docker and deployed/managed production applications on VPS and cloud platforms.
- Collaborated through Git/GitHub workflows, including branching, pull requests, code changes, and team-based development.

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB, PostgreSQL, SQLite, Mongoose, Drizzle ORM

DevOps & Tools: Docker, Git, GitHub, Vercel, Firebase, VPS Deployment

Programming Languages: JavaScript, C, C++, PHP (basic)

Education

B.Sc in Computer Science and Engineering

International Islamic University Chittagong (Jan 2020 – Jan 2025, CGPA – 3.07/4.00)

Projects

Benign Fashion (E-commerce Platform – Solo Project)

Live: [Benign Fashion](#)

Stack: Next.js, TypeScript, Node.js, Express.js, MySQL

- Designed and developed a full-stack e-commerce platform from database design to production deployment using Next.js, TypeScript, Express.js, and MySQL.
- Developed secure authentication, RESTful APIs, admin dashboard, product management, and complete order processing workflows.
- Built responsive shopping, cart, and checkout interfaces optimized for desktop, tablet, and mobile devices.

Safara (Online Learning Management System – Team project)

Live: [Safara](#)

Stack: React.js, Node.js, Express.js, MongoDB, Mongoose

- Contributed to a full-stack learning management platform supporting students, instructors, and administrators.
- Developed RESTful APIs and features for course management, enrollment, authentication, quizzes, reviews, and certificate generation.
- Implemented secure media upload workflows using Multer and Firebase Storage for course videos, images, and PDF resources.

School Management System (Multi-Tenant SaaS Platform – Solo Project)

Live: Private Client Project

Stack: Next.js, TypeScript, Express.js, MySQL

- Designed and developed a multi-tenant School Management System from database design to production deployment.
- Implemented tenant-based architecture, authentication, and role-based access control for Super Admin, School Admin, Teachers, Students, and Parents.
- Developed RESTful APIs, relational database schemas, and responsive dashboards for student management, classes, examinations, results, fees, and academic workflows.
